Independent claims 1 and 5 identify the uniquely distinct features "time code correction section is capable of correcting the first time code in correspondence with any one of a plurality of types of second time code of different resolution, and the resolution of the first time code is a common multiple of respective resolution of the plurality of types of second time code." The closest prior art, Kanda (US 2001/0041049 A1) and Yamauchi (5,956,090) disclose conventional operation information recording apparatus, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Independent claims 10, 16, and 20 identify the uniquely distinct feature "a time resolution of the first time code is a common multiple of respective time resolution of the plurality of the types of time code."
